SAVE THE DATE FOWT MONTPELLIER 2019

Image

The FOWT's Organization committee is pleased to announce that the 4th edition will be held **from April 24th to 26th, 2019**. The French Mediterranean city Montpellier will host [FOWT 2019](#). Don't miss the leading event of the global floating offshore wind community!

REMINDER OF THE CALL FOR PAPERS

As the industry is maturing, the general theme of next year's event will focus on " Floating 3.0 : towards the 1st GW".

According to the current call for paper : If you want to make a presentation, [please refer to the attachment for all necessary information and application guidelines](#).

In the same dynamic as the previous edition, an international Scientific and Technical Committee, set up by the organisation committee, will contribute to evaluate the relevance and quality of the proposals received and to give its views to the programme's relevance and its scientific and technological coherence.

FOWT's main objective is to continue proposing new, varied and relevant presentations where « best of science » and « best of technology » can be seen and discussed. Such focus is certainly one of the reasons behind FOWT success as internationally recognized speakers shared their experiences as well as vision of future challenges in front of an increasingly accurate and expert audience.

The organization committee, composed of the Mediterranean maritime and coastal economy cluster (Pôle Mer Méditerranée), the Marseille Provence Chamber of Commerce and Industry (CCIMP) and the French wind energy association (France Energie Eolienne) are already hard at work to make the 2019 edition an even bigger success.
